

IN THE UNITED STATE DISTRICT COURT FOR THE DISTRICT OF DELAWARE

DR. FREDERICK JOSEPH LANNAK

August 16, 2006

Plaintiff

v.

Case Action No. 06 - 467 (GMS)

SEARS HARDWARE STORE

Defendant

MOTION TO DISMISS THE DEFENDANT'S MOTION TO DISMISS

1. The termination of the Part-Time Plaintiff began several years before his actual termination date of January 18, 2006. The Plaintiff was running off copies of his Equilibrium Scoliosis Research on a store copy machine during non-working hours. A Department Manager complained about this to both the Store Manager and an Assistant Store Manager. When the Plaintiff explained his side of the story to both the Store Manager and the Assistant Store Manager they reprimanded him for running his Equilibrium Scoliosis Research on the store copy machine.

2. Employees and customers are allowed to run anything they want to on the store copy machine and they are never questioned about what they are running. The Plaintiff could run anything he wanted to on the store copy machine except his Equilibrium Scoliosis Research.

3. Whenever anybody does anything anywhere, regardless if it is right or wrong, somebody will always help them. Nobody will help the Plaintiff with his Equilibrium Scoliosis Research because a Code of Silence is being used to make everybody oppose anything that the Plaintiff does with his Equilibrium Scoliosis Research. The purpose of the Code of Silence is to keep everybody away from the Plaintiff so nobody will help him with his Equilibrium Scoliosis Research.

4. The Defendant violated the "Age Discrimination in Employment Act of 1967" to terminate the Plaintiff on January 18, 2006, to take the Defendant, the employees and the customers away from the Plaintiff and his Equilibrium Scoliosis Research

5. The Plaintiff is making a MOTION TO DISMISS THE DEFENDANT'S MOTON TO DISMISS.

The Plaintiff

Dr. Frederick Joseph Lannak

August 16, 2006

Dear Chairman Ken Mehlman:

There are 299 Million people living in the United States. Experts agree that 100 percent of the people living in the United States have a Scoliosis. The Equilibrium Scoliosis Research of Dr. Frederick Joseph Lannak discovered why 100 percent of the people living in the United States have a Scoliosis.

The diaphragm is attached to the lower part of the sternum. The weight of the left-sided stomach pulls the esophageal hiatus of the diaphragm downward that pulls the left side of the sternum downward that crushes the lower left ribs together that is seen in every Scoliosis. The lower left side of the sternum makes the top right side of the sternum (the manubrium) higher. The body bends forward that drives the higher right side the manubrium downward that drives the posterior of the top right rib upward. The driven-up top right rib is attached to the number one dorsal vertebra of the spinal column. The driven-up top right rib pulls the number one dorsal vertebrae to the right creating a right-sided humpback that is seen in every Scoliosis. The right-sided humpback pulls the spinal column to the right that is seen in every Scoliosis that tips the sacrum to the left that pushes the sacrum apex to the right.

Moving three bones straightens a Scoliosis. Moving the right side of the manubrium upward, moving the number one dorsal vertebrae to the left and moving the apex of the sacrum to the left straightens a Scoliosis without any adverse effects.

A Delaware **U.S. Senator Joseph Biden Code of Silence** and a Delaware **U.S. Senator Thomas Carper Code of Silence** are stopping (HHS) Health and Human Services from testing this Equilibrium Scoliosis Research when U.S. Senator Joseph Biden and U.S. Senator Thomas Carper know this Research could help to cure the Scoliosis of 100 percent of the people living in the United States.

Yours truly,

Dr. Frederick Joseph Lannak
